Welcome to our October 2026 Edition!

BLUEPRINT

Pramod K. Jain
Director of Trishala Infrastructure

As we step into the third quarter, we are proud of the progress we are making across our projects.

At Trilok, 25 floors have been completed, while work on the new towers is progressing rapidly. At Saffron 360, we have reached the first level of the foundation—another important milestone in bringing our vision to life.

Beyond construction, what continues to matter most to us is the trust and relationships we build with our customers. Every milestone is a reflection of that confidence.

As we move ahead, we remain committed to building not just homes, but lasting value, stronger communities and relationships that grow with us.

Development Milestones

Construction at Trilok continues to advance steadily across all five towers and key infrastructure areas.

Tower A: First-floor slab work in progress.

Tower B: Tenth-floor slab work in progress.

Tower C: Second-floor slab work in progress.

Tower D: Terrace slab completed; parapet work in progress.

Tower E: First-floor slab work in progress.

Amenity Block: Basement-1 slab work in progress.

Ramp 4: B2-level casting completed; shuttering work in progress at B1 level.

UG Sump: Waterproofing work in the basements is in progress.

Saffron -The journey towards thoughtfully designed living spaces is underway, with construction work now in progress.

Voices of Our Homeowners

Dr. V.N.S.V. Annapurneswara Rao

General Manager (F&A), MIDHANI

TRILOK TRISHALA, located at Satamrai, Shamshabad, Hyderabad, offers a promising blend of peaceful living and connectivity.

Its strategic location near the airport and major road networks adds to its appeal.

With potential for long-term value, it is worth exploring for both homebuyers and investors.

I recommend visiting the project to assess its features and suitability for your future goals.

Ganesh Puja celebrations at Trishala Infrastructure, building community connections through society activations, and strengthening industry ties through CREDAI participation.
